Povzetek

Projekta 'SLO za poklicne šole' in 'SLO za gimnazije' tečeta od 1. 1. 2009 do 1. 9. 2010 v okviru Operativnega programa razvoja človeških virov, delno sofinancirana s strani Evropskega socialnega sklada in izbrana na podlagi javnega razpisa Ministrstva za šolstvo in šport Republike Slovenije.

Projekta zajemata pripravo e-gradiv za slovenski jezik za srednje šole (za poklicne šole in gimnazije) ter pripravo in izvedbo izobraževalnih seminarjev za učitelje (predvsem) srednjih šol. Osnovna ideja priprave kvalitetnih e-gradiv je bila na skupni spletni strani zajeti čim več uporabnih vsebin in jih prikazati na uporabniku prijazen način. Gradiva na spletni strani zajemajo tako jezikovne kot književne vsebine, razvrščene po letnikih, vsebinskih sklopih, prilagojeno posameznemu letniku in vrsti srednješolskega izobraževanja ter upoštevajo učni načrt za slovenski jezik in dosedanje izkušnje avtorjev. Pri projektu sodelujejo učitelji praktiki z različnih stopenj izobraževalnega sistema z namenom združevanja različnih pristopov k pripravi in uporabi e-gradiv.

Namen predstavitve obeh projektov je prikazati timsko delo in primere dobre prakse učiteljem kot možnost dopolnitve oz. izboljšave pouka slovenskega jezika v različnih fazah in vsebinah pouka. Rezultati projekta so namenjeni rabi pri pouku, zato je ključnega pomena projektna predstavitev širši strokovni javnosti s ciljem pritegnitve k uporabi pripravljenih e-gradiv.

Abstract

'SLO for professional schools' and 'SLO for gymnasiums' projects started on 1st January 2009 and finish on 1st September 2010. Projects are within Operational Program of Human Resources Development, partially funded by the European Social Fund and selected on the basis of the invitation of the Ministry of Education and Sports of the Republic of Slovenia.

Projects include the preparation of e-learning materials for the Slovenian language for secondary schools (for professional schools and gymnasiums) and the preparation and implementation of training seminars for teachers of (mostly) secondary schools. The basic idea of preparing quality e-learning materials was a common website implemented with as much useful content as possible that should be displayed in a user-friendly manner. The material on the website includes both linguistic and literary content, specified by the year of education, by content, adjusted to particular year and type of secondary education, along with taking the curriculum for the Slovenian language and experience of the authors into consideration. The project combines the work of teacher practitioners working on different levels of the educational system in order to bring together different approaches of the preparation and use of e-learning materials.

The purpose of the presentation of both projects is to demonstrate team work and examples of good practice to teachers as an option or improvement during teaching at different stages and for different contents at lessons of Slovenian language. As the results of the project are designed to be used in the classroom, it is essential for the project to be presented to the wider public aiming to attract it to use the prepared e-learning materials.
