Povzetek

Ta delavnica bo ponudila pregled nad spektrom učnih aktivnosti, povezanih z nagrajeno Prometheanovo rešitvijo ActivClassroom, ki pokrivajo vse stopnje od vrtca do fakultete. Delavnica bo zelo praktične narave. Udeleženci bodo lahko preverili svoje znanje in spretnosti preko različnih aktivnosti ob uporabi glasovalnih sistemov ActiVote in ActivExpression, dual pen-a ter kratkih lekcij, povezanih s Prometheanovo programsko opremo ActivInspire. Namen delavnice je predstaviti, kako lahko tehnologijo uporabimo za učinkovitejšo izvedbo učnega načrta, pa tudi kako lahko učitelji z uporabo enostavnih tehnik podajajo učno snov na bolj zanimiv in dinamičen način.

Abstract

This workshop will look at a whole range of learning activities built around Promethean's award-winning ActivClassroom solution, from Kindergarten level through to examples of University and College resources. The workshop will be very much hands-on. The audience will be asked to test their knowledge and skills through a range of activities, using ActiVote and ActivExpression learner response systems, dual pens and a range of subject-based mini-lessons built around Promethean's ActivInspire software. The aim is to show how the technology can be used to teach effectively across the curriculum, and how teachers can use simple techniques to create exciting and dynamic classes.
