### Povzetek

Smo v času, ko ima vsaka ustanova svojo spletno stran. Tudi naš vrtec jo je imel. Najeto je imel podjetje, ki je spletno stran postavilo in tudi urejalo. Spletna stran je sicer vsebovala precej potrebnih podatkov, vendar se je nove podatke vnašalo le nekajkrat na leto. Skratka, stran je bila bolj ali manj identična, pasivna. Ob tem ni zanemarljivo, da je bilo potrebno za »vzdrževanje« spletni strani redno mesečno plačevati. Obiskovalci spletne strani, predvsem starši, pa tudi nekateri zaposleni niso bili najbolj navdušeni nad njo. Zato se je nova ravnateljica vrtca zelo kmalu po prihodu odločila, da se spletna stran obnovi s sodelovanjem strokovnih delavcev vrtca (od postavitve do vzdrževanja). Na ta način bi spletna stran postala zares naša, osebna, z našim osebnim pečatom – spletna stran z dušo in ne nekaj industrijskega.

### Abstract

We are living in a time in which every Institution has its own website. Our Kindergarten is not an exception. The Kindergarten website was established and updated by a company specialized in website maintenance. Even though the site included a great deal of essential information, it has been updated only few times a year which made it too passive. Additionally, the site maintenance had to be paid monthly. Visitors of website, mostly parents and few kindergarten employees were unhappy with its content. However, the new headmistress of our kindergarten, soon after her arrival, decided to invite the kindergarten employees to help re-establish and update

the website. Therefore the page could truly belong to the kindergarten, carry the personality of the kindergarten. Moreover, it becomes the website with its own soul and not something industrialized.
