Povzetek

Cilj skupine PERT ("Performance Enhancement Response Team") je pomoč uporabnikom, da bi izkoristili čim več možnosti, ki jih nudijo sodobna omrežja in telekomunikacijski sistemi. Vse bolj zmogljiva omrežja sicer omogočajo vse bolj učinkovito uporabo internetnih storitev, vendar kljub tem nastaja vrzel med visoko zmogljivostjo omrežja in zaznано učinkovitostjo storitve. Včasih uporabniki od storitve pričakujejo več! Tem je namenjen PERT.

Abstract

The goal of Performance Enhancement Response Team is to help users to get more out the network and their end-systems. Modern internet applications are driven by advanced high-speed networks, but often there is a gap between the network speed and perceived end-to-end performance. Users demand for more efficiency and higher application speed. PERT provides support for them.

Ključne besede

PERT, pomoč uporabnikom, komunikacijska omrežja

Key words

PERT, user support, communication networks
